DETAILED ACTION

Allowable Subject Matter

Claim 8 is allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent **claim 8**, the prior art of record fails to teach or fairly suggest the receiver including the video player software application including a video player time base, **the video player time base providing a measure for pacing play of the received compressed signals; the buffering software application including executable steps prescribing: the time offset being a predicted delay value (delta T), the predicted delay value (delta T) initially being an estimate of worst case network delay, the extracted presentation timestamps (PTS's) and predicted delay value (delta T) when added providing the series of respective sums; substituting the respective sums for each presentation timestamp (PTS) to delay playback of each frame by the predicted delay value (delta T); obtaining a local prediction of delay (local delta T) from the video player time base; changing the predicted delay value (delta T) by a difference amount, the difference amount being calculated between the predicted delay value (delta T) and the local prediction of delay (local delta T) before adding the predicted delay value (delta T) to a next extracted presentation timestamp (PTS's) extracted from the series of received I-frame packets; in combination with other elements of the claim.**

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
